

# HAPPY LABOR DAY

Labor Day weekend is here, and many Americans will be getting ready to hit the road for one last trip to close out the summer! Below are a few friendly facts to help keep your trip safer and more enjoyable.

## Fasten your seat belt!

Safety begins as soon as you enter your vehicle. Make sure you and your passengers are buckled up before you depart.

## Timing is everything!

When returning from your trip, avoid peak travel times. Being on the road before 4 P.M. will make for a smoother ride.

## Stay focused!

Distracted or drowsy driving can be hazardous. Make sure you are well-rested before any trips and keep your eyes on the road!

## Do You Copy?

With lots of blind spots and slower braking times than other motor vehicles, it pays to be cautious near big trucks and tractor trailers.

## None for the road.

Drinking & driving simply do not mix. Steer clear of alcohol if you're going to be driving.
